Serial No. 10/710,361 Art Unit: 2451

IN THE CLAIMS

Please amend the claims to read as indicated below.

- 1. (currently amended) A computerized method for determining a desired recipient's email address comprising:
 - a. choosing one or more target recipients;
 - b. providing a unique email server address for each target recipient;
 - c. providing two or more first target recipient's data items;
 - d. guessing a plurality of first target recipient's candidate email addresses from the unique email server address and data items;
 - e. developing a known invalid email address-at for the unique email server address;
 - f. sending a probe email addressed to the known invalid email address;
 - g. monitoring a response of a target recipient email server for the unique <u>email</u> server address-to determine if a bounce to the sending of the probe email occurs;
 - h. determining, from the response, whether the target recipient email server issues a bounce in response to the sending of an email to an invalid email address;
 - <u>i. h.</u> recording that the email address cannot be found if no bounce to the sending of the probe email occurs; <u>and</u>
 - if the target recipient email server issues a bounce in response to the sending of the probe email, then:
 - <u>j. i</u>-sending an email to the first target recipient's first guessed email address;
 - <u>k.</u> j.-monitoring the response of the target recipient email server to determine if a bounce occurs;
 - 1. k. recording a valid email address if no bounce occurs;
 - m. l. sending a second email to the target recipient's second guessed email address if a bounce occurs;
 - n. m. repeating-i, j and l j, k and m using the plurality of first target recipient's guessed email addresses in succession until-j l occurs or there are no other first recipient's guessed email addresses;

Serial No. 10/710,361 Art Unit: 2451

o. n. guessing a plurality of second target recipient's candidate email addresses;

p. o. repeating i, j, k, l and m and l j, k, l, m and n using the plurality of second target recipient's guessed email addresses.

2-12. (canceled)
